

The Student Energy Summit is the most important energy-related event in which any student from around the world can take part.

Student Energy is a global not-for-profit dedicated to **informing, uniting, and inspiring** young energy students from around the world, giving them the tools they need to improve the Global Energy System.

The Student Energy Summit has happened four times, and has gathered around 2,000 future leaders from more than 130 countries. After a competition against prominent universities from around the world, UNAM won the postulation and in 2017 it will happen in Mérida, México.

The 800 Students are brilliant young leaders from around the world; they all go through a selection process that allows us to be sure that only the brightest attend. After previous summits, SES alumni have gone through to take their place as leaders in the Global Energy System, either by establishing their companies such as Iluméxico, or by integrating themselves into existing institutions such as the UN.

The Speakers and participants include leading energy experts from around the world. Past keynote speakers featured **Ms. Sri Mulyani**, Managing Director and CEO of the World Bank; **Mr. Suleiman Jasir Al-Herbish**, CEO of the OPEC Fund for International Development; **Ms. Noeleen Heyzer**, Former Under-Secretary General of the United Nations; and **Rajendra Pachauri**, President of the Intergovernmental Panel on Climate Change; among hundreds of other great speakers.

The Event Partners range from academic institutions, government and international agencies, and of course, the most prominent energy-related companies. Some of our past partners include Shell, FortisBC, British Petroleum, Statkraft, Schneider Electric, Total, Suncor Energy, General Electric. Energy Ministries from México, Canada, Norway, and Indonesia have been on board as well, as well as prominent universities.

Venues, with the support of the State Government of Yucatán, will be the very best of what Mérida has to offer. Nothing in the Summit will be short of top-level, thanks to which we can host the highest of this world's personalities.

The team that will make this happen is a proven, multidisciplinary group of students from some of the best universities of Mexico City, led by UNAM in partnership with ITAM and CIDE.

We dearly hope that you find this attractive, and that we might work together for your benefit and ours so together, we can host the best Student Energy Summit yet.
